

In 1999, after nearly twenty years of fabricating and servicing products for a national vinyl window brand in northern New England, Paradigm Window Solutions For Life—as a brand—began production of a new and unique vinyl window. A window designed in Maine and at home everywhere. A product that could withstand the harshness of a Nor' Easter and the temperature extremes from Fort Kent, Maine to Key West, Florida. A series of window products that balanced the need for traditional craftsman styling and long term cost savings through enhanced heating and cooling thermal performance.

Today, after a decade as the premier window fabricator in New England, **Our brand, *Paradigm Window Solutions***, is turning heads across the country at trade shows, seminars and in local communities like yours. From Architects to curious passersby, every one is looking at this window company that does it right.

Strength, Performance and Beauty.

With aesthetics to please even the most discriminating traditionalist, our products are on display in showcase homes across the entire Eastern United States. From historical period homes and multi-unit residential structures, to contemporary business centers, architects across the country are specifying Paradigm window products. They recognize the value and beauty that having a Paradigm window installed in their project will provide. Our products defy traditional standards.

Classic style, superior performance, and affordable prices... with Paradigm windows, the only thing busted is your heating and cooling bill!

A vinyl window suitable for a building structure in hurricane ally? What company could create such a thing? Not many actually. In fact, one can count on one hand the number of window manufacturers that produce such a product. You can count Paradigm Window Solutions amongst them. A lifetime, non-prorated warranty—*YOUR LIFE TIME*. We believe in the strength and durability of our product so strongly that we back it with one of the most robust warranties in the industry.

The window we created years ago—the one which set the new standard for vinyl windows—is the same window that long before there was a concern for energy efficiency, performed better than the requirements now set forth with the American Recovery and Reinvestment Act of 2009. While many national window brands scrambled to react to the standard, and employed tactics to delay its implementation, Paradigm was busy producing thousands of energy efficient windows.

With a multitude of thermal packages available, Paradigm Window Solutions products have been featured in THREE industry periodical articles championing energy efficiency in homes and 'green' building development projects.

Paradigm windows... Built to a higher standard... Yours.
